EDUCATION

Monash University and CSIRO-Data61 *February 2019 - August 2022 (expected)*
Doctor of Philosophy Supervisors: Jiangshan Yu, Joseph Liu and Shiping Chen
Department of Software Systems and Cybersecurity

The University of Manchester *August 2017 - September 2018*
MSc Advanced Computer Science (with Distinction) Supervisor: Christos Kotselidis
School of Computer Science Overall Percentage: 82/100

Beijing University of Posts and Telecommunications *September 2013 - July 2017*
BSc E-Commerce Engineering with Law Overall Percentage: 83/100

RESEARCH AND IMPACT

I'm broadly interested in distributed systems security. My current research focuses on designing secure and scalable Blockchains and decentralised protocols (e.g., Decentralised Randomness Beacon). My research applies techniques from Cryptography and Distributed Computing.

My research has led to real-world impacts and media coverage. For example,

- I invented RandChain [HYL20], a new family of Decentralised Randomness Beacon protocols that are simple, secure and scalable. This research is featured in VDF Research and was presented at Decrypto seminar series.
- My paper analysing *shard allocation* (a key component and a missing abstraction in sharded blockchains) [HYZ20] is selected as "Paper of the Week" (Issue #68) by ZK Capital.
- I studied two overlooked 51% attacks on PoW-based blockchains [HSY+20]. Three large-scale 51% attacks on Ethereum Classic (1,2,3) happened within a month are likely to be our analysed attacks.
- I identified and formalised an overlooked design flaw of the Atomic Swap protocol [HLY19]. The flaw allows the swap initiator to arbitrage, making the protocol unfair. Our proposed fixes are standardised as an Ethereum Improvement Proposal (EIP-2266). This research is covered by CryptoNews and Monash University, and was presented at Peep an EIP series #23.
- I conducted the first performance analysis on memory-hard mining algorithms [HFK19]. This research is nominated for the best paper at ISPASS'19 and is covered by Horizon Globex.

SELECTED PUBLICATIONS

Full publication list can be found at DBLP and Google Scholar. All of my papers are available online, and most of them are hosted on IACR ePrint.

HYL+20 On the Security and Performance of Blockchain Sharding. Runchao Han, Jiangshan Yu, Haoyu Lin, Shiping Chen, Paulo Esteves-Veríssimo. **In submission**.

HYL20 RandChain: Decentralised Randomness Beacon from Sequential Proof-of-Work. Runchao Han, Jiangshan Yu, Haoyu Lin. **In submission**.

HYZ20 Analysing and Improving Shard Allocation Protocols for Sharded Blockchains. Runchao Han, Jiangshan Yu, Ren Zhang. **In submission**.

HSY+20 Fact and Fiction: Challenging the honest majority assumption of permissionless blockchains. Runchao Han, Zhimei Sui, Jiangshan Yu, Joseph Liu, Shiping Chen. **AsiaCCS'21**.

HLY19 On the optionality and fairness of Atomic Swaps. Runchao Han, Haoyu Lin, Jiangshan Yu. ACM Conference on Advances in Financial Technologies. **AFT'19**.

HFK19 Demystifying Crypto Mining: Performance Analysis and Optimizations of PoW Algorithms. Runchao Han, Nikolaos Foutris, Christos Kotselidis. IEEE International Symposium on Performance Analysis of Systems and Software. **ISPASS'19, best paper nominee**.

TALKS

- Fact and Fiction: Challenging the honest majority assumption of permissionless blockchains. AsiaCCS conference (virtual). June, 2021.
- RandChain: Decentralised Randomness Beacon from Sequential Proof-of-Work. Seminar at Decrypto. November, 2020.
- VRF-Based Mining: Simple Non-Outsourceable Cryptocurrency Mining. CBT@ESORICS workshop. September, 2020.
- Demystifying Crypto-Mining: Analysis and Optimizations of Memory-Hard PoW Algorithms. Seminar at Huawei Noah's Ark Lab. July, 2020.
- On the optionality and fairness of Atomic Swaps.
  - Peep an EIP #23: EIP-2266. February, 2021.
  - AFT conference at Zurich. October, 2019.

TEACHING

- Teaching associate for FIT 5214 Blockchain, Monash University. 2019 Fall.

PROFESSIONAL SERVICES

(External) reviewer

- 2022: EuroS&P
- 2021: DSN, ICBC, IEEE Blockchain, NSS, MSN, TrustCom, IEEE Trans. of Service Computing
- 2020: AFT, ICDCS, SRDS, ACNS, AsiaCCS, TrustCom, ACISP, ICBC, TDSC, The Computer Journal, IEEE IoT Journal, IEEE Software Journal, IEEE Trans. of Service Computing
- 2019: Indocrypt, TrustCom, Future Generation Computing System
